

Appendix: Experimental Data Accessions

In Tables 6 and 7, we provide the accession numbers of all samples used for training and experiments with the rna-seq-star-deseq2 and dna-seq-varlociraptor workflows. Information on the samples can be retrieved via the European Nucleotide Archive²⁸. Table 8 lists the genome partitions of the T2T-CHM13 v2.0 assembly used for training and experiments with the stained-glass workflow.
